

Suggested Compliance in Calling NJ1Call

Notify NJ1 Call under the following situations:

- A Liquid Termite Job
- A Liquid Termite Re-treatment
- Installation of Termite Baiting
- Installation of Underground Pest Monitoring System
- Installation of any other device that penetrates the soil
- Rodent bait stations that are secured to the ground utilizing a device that penetrates the soil
- All properties that have a termite baiting system or pest monitoring system (Note: if you never have to replace a device or add supplemental stations you technically do not have to do this although we are recommending that all properties with these systems be called in).

You do not need to notify NJ1Call in the following situation:

- Routine Maintenance of existing accounts is exempt from NJ1Call notification. This means that if a property you are servicing has been previously marked out, it is not necessary for you to notify NJ1Call a second time.

Keep a permanent record of your NJ1Call "ticket number" for the property.

Learn how to read a mark out and how to insure that you do not affect a utility during your activities.
